

COVID-19 HYGIENE SCREENS

To assist the return to work for UK businesses Urban Square has developed a range of Coronavirus Protection Screens for temporary or permanent placement. We offer standard sizes to suit most reception counters and desks and can create bespoke solutions to meet the specific needs for Offices, Receptions, Canteens and Restaurants where an off the shelf solution will not work.

Do not settle for a quick economical solution. Consider appearance, longevity and practicality.

Glass is a great medium to long term solution. It's easy to clean, tough and hard wearing. It also accepts all non-abrasive cleaning methods whereas acrylic can be too flexible, too easy to scratch and requires specialist cleaners to avoid crazing or the panels going misty.

The first question you need to consider is for how long the screens need to be in situ. Current thinking is, until a vaccine has been found.

If they are temporary then the design needs to be freestanding or lightly fixed (bonded) so after removal the desk or counter can revert back to normal without the need to replace or make good. Most designs on the market rely upon mechanically fixed clamps or feet which can leave ugly holes after removal.

At Urban Square we have designed a range of temporary and permanent screen solutions not only with employee and visitor safety in mind but with aesthetics and easy removal included. You do not need to install ugly acrylic screens which detract from your current look.

Our goal is to implement screens and dividers so they look like they were part of the original design.

Our products offer the best in aesthetics, functionality and performance. We are confident we can offer you the best system for your project.

Using glass panels with metal connectors and channels we have designed a range of solutions to cover different manufacturers designs and configurations of office desks.

DESK SCREENS

From singles up to back to back banks of 12 desks or more our modular system of glass to glass panels creates a safe working environment for each workstation, enabling all desks to be used with the dividers extending between the chair positions. These can be temporary or permanent depending on your scheme.

Using clear toughened safety glass the transparent screens will not obscure vision or reduce light allowing you to maintain the way you previously worked as much as possible. With decades of experience in glass screens and partitions we can meet complex requirements using our wealth of knowledge of both systems and legislation as to what can be used.

GET IN-TOUCH TODAY FOR A QUOTE

We are happy to quote for any screen design, from the very simple to the very complex. Please contact us for a no obligation quote and survey if required and allow us to assist you in the implementation of your social distancing measures within the workplace.

Reception screens need to protect both visitors and employees whilst enabling easy communication.

RECEPTION SCREENS

We offer a range of freestanding glass screens with steel feet in RAL powder coated finish to suit your reception or corporate image. With sleek, minimalist designs and speech holes or letter windows our glass screens offer a quick and attractive solution which can be mechanically fixed, freestanding or bonded to any counter. We also offer floor standing and floor fixed screens, either from floor to ceiling or secured

to the floor enabling you to reduce and direct the flow of visitors and employees. To help with queuing and ticketing we also offer full height floor fixed glass balustrading with heavy duty base rails and 1.8m high glass panels allowing you to minimise the loss of space through social distancing measures and keeping the visibility as it was before.

New requirements for social distancing will severely limit the use of staff restaurants and canteens.

CANTEEN & RESTAURANT SCREENS

With many companies choosing to scale back on their food offer the need to maintain some kind of offer, whether for pre-packaged food or hot drinks is paramount in having a happy work place. We can install glass sneeze screens and protection screens around counter areas to maintain social distancing from those serving. We can include payment and delivery windows within the glass screens, maintaining easy ordering, payment and collection to assist in a speedy transaction, reducing the wait time and length of queue.

We also offer more simple freestanding counter and table screens which can be repositioned as needed. For improved germ protection we also offer glass wall solutions for easier cleaning and better hygiene. With a non-porous hard-wearing surface glass is an ideal material for use as a splashback to coffee stations, serveries and bathrooms. Our glass splashbacks are available in any colour to enhance the look of your walls and bring added colour to the workplace.
